Jeison Joe J L

FrontEnd Engineer

jeisonjoe67@gmail.com | 9487404923 | Portfolio | LinkedIn | Github

SUMMARY

Frontend Developer with 2.8 years of experience building responsive, high-performance, and animated web interfaces using React, Next.js, GSAP, and Tailwind CSS. Skilled in full-stack development with WordPress and PHP, capable of delivering dynamic, visually engaging websites end-to-end. Possesses a keen eye for pixel-perfect UI, strong communication skills, and a collaborative mindset that thrives in team-oriented and Agile environments.

Experience

Frontend Engineer, AdminDroid, Chennai, India   Jan 2023 – Present

- Designed, developed, and maintained three WordPress-based websites: blog.admindroid.com, o365reports.com m365scripts.com; ASP.NET pages: HowTo Page; end-to-end, handling layout design using Figma, custom theme, plugin development, and continuous updates to ensure stability and compatibility.
- Built each website from scratch using HTML, CSS, JavaScript, jQuery, and WordPress, adhering to brand guidelines and ensuring responsive, accessible UI across all devices.
- Integrated and configured Google Analytics and custom event tracking, enabling detailed insights into user behavior and engagement metrics.
- Optimized website performance and SEO, improving page load times, Core Web Vitals scores, and organic visibility through best practices asset optimization, and semantic markup, leading to a steady increase in engagement, organic traffic and search visibility across all company websites.
- Contributed to product feature development using Ember.js and React, enhancing UI functionality and front-end performance Reminders and Follow-ups feature.
- Actively managed site maintenance, debugging, and deployment, ensuring continuous uptime, security compliance, and version control best practices.
- Stayed up to date with emerging technologies and trends in software development, applying them to optimise system design and performance
- Utilized **HTML, CSS, Sass, JavaScript, Figma, jQuery, React, Ember.js, C#,ASP.NET, Wordpress, PHP, Git** to design, develop and deliver robust, high performance web applications.

Projects

Move In Dubai Real Estate - Freelance Project   moveindubai.com

Designed and developed the complete company website — moveindubai.com — using Figma, WordPress, and custom front-end development (HTML, CSS, JS, GSAP, PHP) to deliver a visually engaging and high-performing real estate platform. Integrated Propspace CRM with WordPress, enabling automated synchronization of property listings between the CRM and website, eliminating manual updates and ensuring real-time data consistency.

Personal Projects - Learning & Exploration   jeisonjoe.vercel.app

Developed multiple personal web applications (available on jeisonjoe.vercel.app) to experiment with modern frontend technologies including React, Next.js, Tailwind CSS, GSAP animations, and Firebase. Focused on building end-to-end functional prototypes such as e-commerce and finance tracker apps — strengthening skills in UI development, state management, authentication, and database integration.
